Operative Skills in Urology: Modules 1&2

This course aims to teach the principles and basic skills in the diagnostic and operative procedures required for the practice of core urology.

Course content includes

- The use of flexible and rigid cystoscopes, and rigid ureteroscopes and associated equipment
- The complications and limitations of cystoscopy and ureteroscopy
- The techniques of diagnostic flexible and rigid cystoscopy and blue light laser cystoscopy including bladder biopsy, bladder washout and JJ stent insertion and removal

Delegate feedback

"Excellent course. Very relevant to everyday practice. I will use the skills learnt the next time I am in theatre. The use of models, cadavers and live diathermy was brilliant."

"Really enjoyed and benefited from using the lab and equipment. Excellent to be able to use different scopes and have feedback from faculty on skills. Cadavers for tapes were good."

Who should attend?

CT1, CT2, ST3 and SAS Grades

Delegate feedback

- Lectures and small group discussions and demonstrations
- Video demonstration and hands-on experience with trainer models, model patients or tissue models
- Cadaveric demonstrations

Courses

Date: 3 – 4 November 2016

Held at: RCS London

Course fee:
- Full Course Fee: £740
